

SERVICE BRIEF

Below is a listing of some, but not all, of the services we provide:

- **Assessment, Inspection & Analysis** – physical and managerial; conducted on-site to identify and define safety issues for focusing the safety process and strategy.
- **Problem Resolution** – on-site and research; identify and define the problem, and develop solution options.
- **Safety Programs** – organize and write; formalize the safety process with documentation tools.
- **Safety Training** – skill-enhancing education with tests; target desired safety practices, recording of completion and transfer of learning (workbook, video, and computer-based).
- **Safety Metrics** – identify effective measures; relate to business goals and desired outcomes.
- **Safety Integration** – cultural, behavioral, managerial based; align to business goals and outcomes.
- **Industrial Hygiene** – identify sources and offer options to resolve. IH service includes but not limited to:
 - Noise Survey – measurement of noise exposure; reduce levels.
 - Air Monitoring Survey – measurement of airborne levels; reduce containments.
- **Ergonomics** – office and industrial evaluations, teams, programs.
- **Product Safety** – RSL's, test requirements, vendor agreements, consumer product safety gap analysis, recall protocols, etc.
- **Business Continuity Plan** – pre-event preparation, event response, and post-event management recovery; delivery of formalized, organized process, practice scenarios and drills.
- **On-Site Safety Manager** – monitor performance and act as SH&E manager to address safety, health and environmental concerns; keep the company abreast of safety issues impacting operations.
- **Cal / OSHA Preparation and Representation** – present on-site with CAL/OSHA visits, assistance with completion of compliance visit paperwork and documents, preparation of response to alleged citations, preparation for scheduling appeal and informal conference, and attendance at informal conference.

Agriculture (row, tree, packing)	Entertainment (television, cable, internet)
Wholesale / Retail	Apparel / Clothing (manufacturing, import, export)
Food (processing, service)	Distribution
Finance & Insurance	Public (city, county, state, federal levels)

Desired Outcomes:

- Increased efficiency
- Improved productivity
- Enhanced profitability
- Reduction of losses / injuries and their associated costs
- Lower insurance costs
- Greater insurance market access
- Competitive advantage
- Enhanced organizational culture
- Specific for the organization
- Integrated approach from within operations
- Measurable results
- Customer satisfaction

Benefits of Hiring a Professional Safety, Health & Environmental Consultant:

- Reduce overhead costs
- 100 percent business expense (deductible)
- Your safety and training manager, if you have one in-house, usually has more on his/her plate than the original job description depicts, or can handle
- A professional consultant is not bogged down by your company's internal affairs, nor is he/she influenced by your past safety record
- Service available either as needed or specified by contract
- Training available for employees when required
- OSHA intervention service available by someone who has experience dealing with the agency, can negotiate on your behalf, and can save you some serious expenses, should you be fined
- Pre-OSHA inspection service and recommendations to correct potential problems at your site
- Safety assessments to benchmark certification attainment such as ISO 14001, OHSAS 18001, and ANSI Z10 OHSMS
- Experienced, educated, and up to date on safety regulations required to keep your business compliant
- Available to check current safety manuals and upgrade as required, or write / re-write new safety manuals specific to our company / industry needs
- Annual contracts available for greater savings
