Benefits of Hiring a Professional Safety, Health & Environmental Consultant:

- 100 percent business expense (deductible)
- Time: the person responsible for safety, if you have one in-house, usually has more on his/her plate than the original job description depicts, or can handle
- Experienced, educated, and up-to-date on safety regulations, best practices, and safety culture development
- Flexibility in serving your needs from a project to a few hours a month to full-time if needed
- OSHA intervention service, including Pre-OSHA inspections, available by someone who has experience dealing with the agency, can negotiate on your behalf, and can save you some serious expenses, should you be fined
